

Smart capital planning for local and regional government agencies

Essentials Plan helps local government agencies identify funding needs, assess and prioritize projects, and build multiyear capital improvement plans. With AI-powered scenario modeling and forecasting, it enables smarter funding decisions aligned to strategic goals and community impact.

Transform capital planning

Select the right projects with confidence using scoring tools aligned to strategic goals, financials, and risk.

Easily **create and compare multiple scenarios** based on risks, scoring, and budgets using AI-powered multiyear CIP planning.

Build your multiyear CIP program and have it execution-ready in minutes

Short learning curve | Quick deployment | Affordable | Proven track record

Spreadsheets and generic ERP tools are not built to handle the complexity of capital planning. Local and regional agencies require a purpose-built solution to ensure funds are allocated to the right projects. With finite resources and growing demands, it's critical to do more with less—automating manual tasks to reduce errors, minimize delays, and prevent budget overruns.

Powerful capital planning solution purpose built for MPOs, local, and regional government agencies

Business needs and project charters

- Charter life cycle management
- Business case definition
- Financials and risks
- Milestone tracking
